

Big Benefits for Business - Sustainability in Practice -

Save money, resources and blitz your sustainability targets in a single bound!

Join Engineers Australia for an informative session highlighting the benefits of implementing an effective environmental management system (EMS) in your business. A number of sustainability champions from industry will outline examples of how they have elevated sustainability initiatives to drive strategies leading to increased profit, performance and productivity as well as address goals relating to corporate and social responsibility (CSR).

Sustainability Champions:

- **Implementing an effective EMS for your business**
Robert Lyons - Manager of Industry Services, SA EPA.
- **Holding a sustainable conference – is it achievable?**
Lara Harland – Principal Environmental Consultant, EnviroEngineering Solutions.
Chair of the national SSEE board.
- **Sustainability – It's about doing better business**
Katie Hulmes, B.Sc B.Eng MEIANZ, Group Environmental Specialist – OZ Minerals.

The presentations will be followed by a question-and-answer session to discuss potential actions and outcomes.

WHEN: Thursday 22nd March 2012 - 5:30pm to 7:00pm
WHERE: Engineers Australia, Level 11, 108 King William Street, Adelaide.
RSVP: Wednesday 21st March 2012
