

Presents:

Tuesday 16 February 2010

Time: 5:30pm for 6:00pm start

Venue:

Hawken Auditorium
Engineering House
447 Upper Edward St
Brisbane

Cost:

Members	\$15
Non Members	\$20
Students	\$10

Please register to assist catering

Speaker:

Professor David Hood

David Hood is a Chartered Professional Engineer, registered on NPER to practice in civil and environmental engineering. He has extensive experience in business, engineering, education, project management, and senior executive positions in both the public and private sectors.

David is Chairman of his own consulting engineering practice specialising in the areas of sustainability in the built environment, "green projects", energy efficiency policy, engineering education and global engineering infrastructure. As a Board member and Chairman of Australia's College of Environmental Engineers (2008/09), David has been driving change to inculcate a sustainability culture across education in engineering and the built environment disciplines.

David is the inaugural Chairman of the Australian Green Infrastructure Council (AGIC). David sits on a number of industry, community and university advisory boards where his extensive engineering background, and considerable involvement at a senior level in the built environment sector is influencing change in the "energy culture" of Australia.

David is an accredited presenter on Al Gore's Climate Project, and an Adjunct Professor in the Faculty of Built environment and Engineering at QUT.

Drinks and Networking

Please join us for a few drinks and light supper after the presentation.

The presentation will count as one hour towards your CPD.

Visit the Engineers Australia Qld website at:

What really happened in Copenhagen?

And, what does it all mean for us?

Is the Copenhagen Accord worth anything? Will countries now commit to specific targets and real action that can avoid global temperature rising more than 2 degrees Celsius, and will a legally binding treaty be a reality later in the year?

With nearly 1 degree C increase in temperature across Australia over the last decade, we are well on our way to being one of the countries to be hardest hit by climate change in the world. Do we want a land constantly ravaged by drought, fire, dust storms, flood, cyclones and storms? Or can we harness the opportunity and build a robust green economy?

Apart from the Government representatives in Copenhagen, there were close to 50,000 members of civil society. There were over 1000 side events and exhibitions presenting the latest thought leadership on topics from measuring wellness to rebuilding our "commons", and of course, market and financial solutions a plenty....

David Hood was there and was not happy. Come and hear David's thoughts on the outcome, and some of the more positive things coming from COP15, and what it all means to you, your business and the community.

Yes, I will be attending the **Copenhagen** session on **16 February 2010**

For catering purposes please register by 12pm on Friday 12 February

To register:

- Email a completed form to Queensland Division at qld@engineersaustralia.org.au
- Fax your registration to (07) 3832 2101
- Phone (07) 3832 3749

Name (s) _____

Company _____

Address _____

Telephone _____

E-mail _____

___ Members	x	\$15.00 (Inc GST)	\$ _____	(SSEE or Engineers Australia)
___ Non-members	x	\$20.00 (Inc GST)	\$ _____	
___ Students	x	\$10.00 (Inc GST)	\$ _____	(Fulltime or undergraduate)

Please register me and I will pay on the night £ _____

Payment by cheque:

Please make cheques payable to the Institution of Engineers, Queensland Division

Payment by credit card:

Bankcard MasterCard Visa Diners Amex

Amount \$ _____

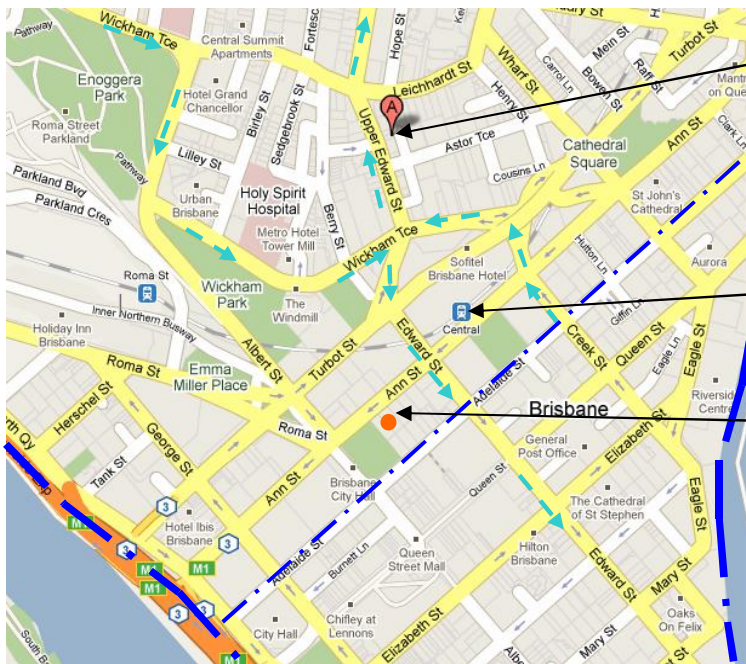

Card number _____

Expiry date _____ Signature _____

Cardholder's name _____

Once completed this form is a valid tax invoice. ABN 54 586 415 692
